

I am writing in support of the extension of several changes in election administration regarding Covid 19. As someone who found it important to my health and that of at-risk extended family to be able to use Covid 19 as a reason to vote by absentee ballot during the ongoing pandemic, I am very concerned about preserving that ability. The virus is very definitely still with us, and the timing of the next surge is uncertain,.

All eligible voters should be able to continue to exercise their right to vote without worrying about exposure to Covid19. Equally, those recently exposed to Covid19 should not lose their right to vote while they are in isolation.

Thank you,
